FASTENERS AND JIGS & FIXTURES

SJQH2L

Learning Objectives

1. Students to know about the fastners like nuts, bolts, washers, screws.
2. To know about threads and types and its uses.
3. To know about the nomenclature of threads.
4. To know about the key and key ways and its uses.
5. To know the design and creation of jigs and fixtures with regarding to job fitted with machine.

Table of Content

7.1 Introduction
7.2 Types of Fastener – Bolts – Nuts – Washers
7.3 Threads Nomenclature of Threads – Types of Thread
7.4 Keys and Key Ways – Types of Key
7.5 Jigs & Fixtures – Introduction – Types of Jigs & Fixtures – Purpose of Jigs & Fixtures – Jig – Parts of Jig – Types of Jig - Fixtures – Parts of Fixture – Types of Fixture
7.6 Location and Locators
7.7 Difference between Jigs & Fixtures
7.8 Advantages of Jigs & Fixtures

7.1 Introduction

- Fastener may be defined as a machine element used for holding or joining two or more parts of a machine or a structure. This process of joining the parts is known as fastening. Machines, vehicles, playthings are made by joining some spare part together.
- Bolt and Nut, screws, rivet, cotters, key and keyways, couplings, welding and soldering are materials which are used to assemble many machines and others.
