11. Induction motors are widely used in industrial drives
12. For cooling purpose, light aluminum fans are used in three phase A.C motors
13. No external supply is given or taken in squirrel cage rotor
14. In a single phase motor, stator windings are:
    1) Main Winding, and
    2) Auxiliary Winding
15. Either by changing main winding terminals or by changing auxiliary winding terminals, the reversal of direction of rotation is obtained in capacitor type motors
16. Stepper motor is an electromechanical device

GLOSSARY

Alternator (or) AC generator	—	மாறுதிசை மின்னாக்கி
Stator	—	நிலையி
Rotor	—	சுழலி
Slot	—	பள்ளம்
Squirrel cage motor	—	அணில் கூடு வகை மின்னோடி

Activities

1. Construct a small working model by using stepper motor (children toy)

Synchronous Motor

1. Identify the motors which is used in the following domestic appliance.

   a) Mixie b) Grinder c) Washing Machine d) Fan
