Q A PART C

Mark 5

Answer the Questions not Exceeding one page

1. Compare the salient pole type rotor with smooth cylindrical type rotor.
2. Explain the advantages of stationary armature and rotating field system.
3. What are the type of single phase motors?
4. Explain double field revolving theory.
5. Explain the construction of squirrel cage rotor.
6. What are the application of following motors?
   a. Spilt phase motor
   b. Universal motor

Q A PART D

Mark 10

Answer the Questions not Exceeding two page

1. Explain the salient pole and non salient pole alternator with neat sketch.
2. With neat sketch, explain the operation of an alternator.
3. Explain the construction and operation of single phase capacitor start Induction run motor.
4. Explain with neat sketch about universal motor.
5. Briefly explain the various types of stepper motor.
