Hacksaw

Uses

It is made up of a sturdy nickel plated steel frame. The frame can be adjusted between 250mm to 300mm blades. It should be fixed on the frame with its teeth pointing away from the handle in order to the cutting in forward stroke. It is mainly wood saw (or) tenon saw.

Generally the length of a tenon saw is 250 to 300mm and has 8 to 12 teeth per 25.4mm and the blade with 10cm. It is used for cutting thin, wooden accessories like wooden batten, casing capping, boards and round blocks.
