PREFACE

XI - GENERAL ENGLISH

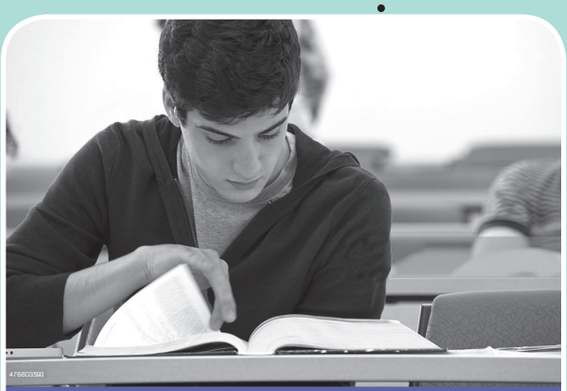

The 21st-century learner needs to be able to competently collaborate, think critically, solve problems and access digital resources proficiently. Therefore, the revised textbook for English Class XI is based on the communicative approach that recognizes our learners' need to:

- seamlessly integrate the use of the four major language skills, namely, listening, speaking, reading and writing, naturally and confidently.
- develop an attitude of enquiry and skills for independent research. [Higher Order Thinking Skills – **HOTS**]
- continue to use English effectively and appropriately for study purposes across the curriculum at +2, and in future academic, professional / vocational and social contexts.
- speak fluently and write accurately, scaffolded by clear guidelines with examples to ensure appropriate use of format, style, structure etc.

The textbook offers clear, simple guidelines that address learners directly and support efficient class organization, namely, individual work, pair work, small group work and whole class work.

The syllabus aligns with the recommendations of the National Curriculum Framework 2005.
