Evaluation

1. A living organism is differentiated from non-living structure based on
   a. Reproduction
   b. Growth
   c. Metabolism
   d. All the above
2. A group of organisms having similar traits of a rank is
   a. Species
   b. Taxon
   c. Genus
   d. Family
3. Every unit of classification regardless of its rank is
   a. Taxon
   b. Variety
   c. Species
   d. Strain
4. Which of the following is not present in same rank?
   a. Primata
   b. Orthoptera
   c. Diptera
   d. Insecta
5. What taxonomicaid gives comprehensive information about a taxon?
   a. Taxonomic Key
   b. Herbarium
   c. Flora
   d. Monograph
6. Who coined the term biodiversity?
   a. Walter Rosen
   b. AG Tansley
   c. Aristotle
   d. AP de Candole
7. Cladogram considers the following characters
   a. Physiological and Biochemical
   b. Evolutionary and Phylogenetic
   c. Taxonimic and systematic
   d. None of the above
8. Molecular taxonomic tool consists of
   a. DNA and RNA
   b. Mitochondria and Endocplamic reticulum
   c. Cell wall and Membrane proteins
   d. All the above
9. Differentiate between probiotics and pathogenic bacteria.
10. Why mule is sterile in nature?
11. List any five salient features of the family *Felidae*.
12. What is the role of Charles Darwin in relation to concept of species?
13. Why elephants and other wild animals are entering into human living area?
14. What is the difference between a Zoo and wild life sanctuary?
15. Can we use recent molecular tools to identify and classify organisms?
16. Explain the role of Latin and Greek names in Biology.

ICT Corner — Deep Tree

Let's do this activity to know the position of a particular species in the **Evolution path**.

Step – 1: Type the URL in the browser. Click 'Play Game' button then use your personal or school id to login. Otherwise use Guest Pass to enter. Then click the DEEP TREE icon that is given below The Evolution Lab to start the activity.

Step – 2: Input the common name of any animal in the SEARCH tab given at the bottom of the activity window, select the appropriate Zoological name from the list appeared.

Step – 3: The Classification and the place of the species in the animal Kingdom can be viewed by clicking the Icon placed next to the search tab.

Step – 4:Two different species can be compared by clicking on the RELATE button given at the bottom of the activity window. The relation between those species can be learnt by clicking the DNA icon appeared.
