27. Identify the structure that the archenteron becomes in a developing animal.
28. Observe the animal below and answer the following questions

    a. Identify the animal.
    b. What type of symmetry does this animal exhibit?
    c. Is this animal Cephalized?
    d. How many germ layers does this animal have?
    e. How many openings does this animal's digestive system have?
    f. Does this animal have neurons?
29. Choose the term that does not belong in the following group and explain why it does not belong?

    Notochord, cephalisation, dorsal nerve cord and radial symmetry.
30. Why flatworms are called acoelomates?
31. What are flame cells?
32. Concept Mapping - Use the following terms to create a concept map that shows the major characteristic features of the phylum nematoda:

    Round worms, pseudocoelomates, digestive tract, cuticle, parasite, sexual dimorphism
33. In which phyla is the larva trochopore found?
34. Which of the chordate characteristics do tunicates retain as adults?
35. List the characteristic features that distinguish cartilaginous fishes with living jawless fishes.
36. List three features that characterise bony fishes.
37. List the functions of air bladder in fishes.
38. Write the characteristics that contributes to the success of reptiles on land.
39. List the unique features of bird's endoskeleton.
40. Could the number of eggs or young ones produced by an oviparous and viviparous female be equal? Why?

ICT Corner Cladogram

Let's do this activity to know about **Cladogram**.

Step – 1 Type the URL given below in the browser. Press 'Play Game' button then use your personal or school id to login. Otherwise use Guest Pass to enter and start the activity.

Step – 2 Initially you will be provided with two species and their characteristics. You should drag them into the small box provided and match them.

Step – 3 Use the mouse to drag and place the characteristics on the tree.

Step – 4 If you correctly match the tree, the game will proceed to the next level. If you fail to match them start from the beginning and play the game again until you learn the characteristics.
