ovoid structures. They are located behind the kidneys in the abdominal cavity.

A pair of oviducts opens into the body cavity by a funnel shaped opening from each side of the ovary. The anterior part of the oviduct is the fallopian tube. It leads into a wider tube called the **uterus**. The uterus join together to form a median tube called **vagina**. The common tube is formed by the union of urinary bladder and the vagina and is called the **urinogenital canal** or **vestibule**. It runs backwards and opens to the exterior by a slit-like aperture called **vulva**.

A pair of **Cowper's gland** and **perineal gland** are the accessory glands present in the female reproductive system.

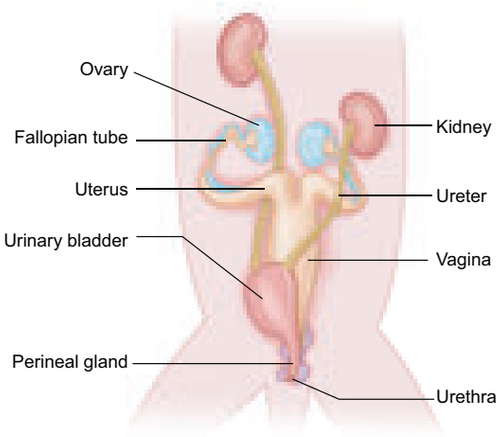

**Fig. 13.12** Female reproductive system of Rabbit

## Points to Remember

- Leech is metamerically segmented and has 33 segments.
- It has two suckers which are used to attach to the body of the host. It is also involved in locomotion.
- The salivary glands of leech produce an anticoagulating substance called hirudin.
- Leech is a hermaphrodite.
- Rabbits are warm blooded vertebrates.
- Canine teeth are absent in rabbit.
- Respiration takes place through a pair of lungs in rabbit.
- The heart is four chambered consisting of two auricles and two ventricles.
- Urinogenital system comprises the urinary (or) excretory system and the genital (or) reproductive system.
- Mammary glands are modified glands of the skin and help in nourishing the young ones.

## TEXTBOOK EVALUATION

### I. Choose the correct answer

1. In leech locomotion is performed by
   a) Anterior sucker
   b) Parapodia
   c) Setae
   d) Contraction and relaxation of muscles
2. The segments of leech are known as
   a) Metameres (somites) b) Proglottids
   c) Strobila d) All the above
3. Pharyngeal ganglion in leech is a part of
   a) Excretory system b) Nervous system
   c) Reproductive system d) Respiratory system
4. The brain of leech lies above the
   a) Mouth b) Buccal Cavity
   c) Pharynx d) Crop
5. The body of leech has
   a) 23 segments b) 33 segments
   c) 38 segments d) 30 segments
6. Mammals are _____ animals.
   a) Cold blooded b) Warm blooded
   c) Poikilothermic d) All the above
