II. Fill in the blanks

1. _____ is the longest cell in our body.
2. Impulses travels rapidly in _____ neurons.
3. A change in the environment that causes an animal to react is called _____ .
4. _____ carries the impulse towards the cell body.
5. The two antagonistic component of autonomic nervous system are _____ and _____.
6. A neuron contains all cell organelles except _____ .
7. _____ maintains the constant pressure inside the cranium.
8. _____ and _____ increases the surface area of cerebrum.
9. The part of human brain which acts as relay center is _____ .

III. State whether true or false, if false write the correct statement

1. Dendrons are the longest fibres that conducts impulses away from the cell body.
2. Sympathetic nervous system is a part of central nervous system.
3. Hypothalamus is the thermoregulatory centre of human body.
4. Cerebrum controls the voluntary actions of our body.
5. In the central nervous system myelinated fibres form the white matter.
6. All the nerves in the body are covered and protected by meninges.
7. Cerebrospinal fluid provides nutrition to brain.
8. Reflex arc allows the rapid response of the body to a stimulus.
9. Pons helps in regulating respiration.

IV. Match the following

Column I	Column II
A. Nissil's granules	Forebrain
B. Hypothalamus	Peripheral Nervous system
C. Cerebellum	Cyton
D. Schwann cell	Hindbrain

V. Understand the assertion statement. Justify the reason given and choose the correct choice

a. Assertion is correct and reason is wrong

b. Reason is correct and the assertion is wrong

c. Both assertion and reason are correct

d. Both assertion and reason are wrong

1. **Assertion:** Cerebrospinal fluid is present throughout the central nervous system.
   Reason: Cerebrospinal fluid has no such functions.
2. **Assertion:** Corpus callosum is present in space between the duramater and piamater.
   Reason: It serves to maintain the constant intracranial pressure.

VI. Short answer questions

1. Define stimulus.
2. Name the parts of the hind brain.
3. What are the structures involved in the protection of brain?
4. Give an example for conditioned reflexes.
5. Which acts as a link between the nervous system and endocrine system?
6. Define reflex arc.

VII. Differentiate between

1. Voluntary and involuntary actions.
2. Medullated and non-medullated nerve fibre.

VIII. Long answer questions

1. With a neat labelled diagram explain the structure of a neuron.
