- Relations
  - Domain and range of relation
  - Extreme relations (empty and universal)
  - Inverse of a relation
  - Reflexive, Symmetric, Transitive, Equivalence Relations
- Functions
  - Definition, domain, co-domain, range, image, pre-image,
  - Tabular, graphical, analytical and piecewise representations,
  - Identity function, constant function, zero function, modulus function, signum function, greatest integer function, smallest integer function,
  - Injective, surjective and bijective functions,
  - Vertical test and Horizontal test,
  - Composition of functions, inverse of a function,
  - Addition and multiplication of real valued functions,
  - Polynomial function, linear function, exponential function, logarithmic function, rational function, reciprocal function,
  - Odd and Even functions.
- Graphing functions
  - Reflection, translation, dilation
  - Drawing graph of some seems to be complicated functions.

ICT CORNER-1(a)

Expected Outcome ⇒

Step–1
Open the Browser and type the URL Link given below (or) Scan the QR Code.

Step–2
A workbook named "Graph of Special Functions" will open. 7 worksheets are given in this workbook related to Functions and Graph. Select a worksheet named "More Modulus Functions"

Step–3
Right side of the work sheet There are check boxes for many modulus functions

Step–4
You can click on any check box to view the Graph. Now Move the Slider a to change the function and observe.
