increasing the workability of concrete by the aid of plasticizers and super plasticizers.

4.1.10.3 High Strength Concrete

Concrete which is designed to have strength 40 N/mm^2 (Grade 40) and above is called high strength concrete.

4.1.10.4 High Performance Concrete

Concrete which is designed to have strength more than 60N/mm^2 is called high performance concrete. Also these concrete have special characters like high workability, high resistance to corrosion, etc.

DO YOU KNOW?

Precasted concrete construction is the modern type of construction now-a-days.

4.3.11 Other Types of Concrete

In addition to the above concretes, a large number of special types of concretes are made for special purposes. They are:

i. Fibre reinforced concrete.
ii. Light weight concrete.
iii. Fly ash concrete.
iv. Silica fumes concrete.
v. Polymer concrete.
vi. Ferro cement concrete.
vii. Pre packed concrete.
