

### 5.1.5.6 Block Board

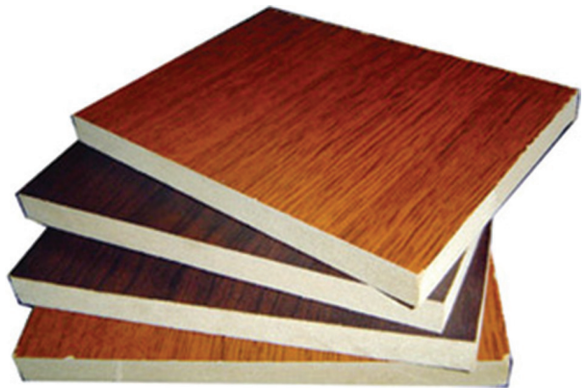

Block boards are made up of a core of softwood strips. These strips may be 25mm wide. The strips are placed edge to edge and sandwiched between veneers of hardwood. The sandwich is then glued under high pressure. These boards are not suitable for outdoor use. It is available as sheets of 2440 × 1220mm in size with 30mm thickness.

### 5.1.5.7 Laminated Board

Laminated boards looks very similar to blockboards but it is made up of softwood strips, 5-7mm in width. It is also sandwiched between two outer Veneers with the grains running at right angles to the core strips.

## 5.1.6 Uses of Timber in Constructions

1. It can be used in the form of vertical posts, beams, lintels, etc.
2. It can also be used as members of roofing trusses and rafters.
3. It is used as form work for cement concrete structures.
4. It is very much used in timbering in the deep trenches.
5. It is an important material for furniture making.
6. It is very much used in making sports goods, musical instruments, agricultural implements, etc.
7. It is used in making woods floors, partitions, doors and windows, etc.

**ACTIVITY 2**

a. Collect some small samples of different types of timber. Smell and weight it.

b. Prepare a comparison statement for its colour, smell, weight, grains, etc.
