5.2.4 Uses of Lime

The following are uses of lime in construction.

i. For white washing.

ii. To prepare Mortar for Masonry and plastering work.

iii. To prepare lime-sand brick.

iv To stabilize earth.

v As inner lining in open hearth furnace.

vi In manufacturing of cement.

5.2.5 Difference Between Fat Lime and Hydraulic Lime

S.no	Property	Fat Lime	Hydraulic Lime
1	Main ingredient	95% calcium oxide. 5% clay soil.	5% to 30% clay soil and small quantity of ferrous oxide.
2	Slacking action	Quickly slacks. At that time volume is increased upto two times. Heat and sound occurs.	Slow slaking property. No sound and heat releases when slakes.
3	Setting action	Slow setting property. Absorbs carbon-di-oxide from the atmosphere and converts as calcium carbonate.	Sets under water. It changes as tricalcium aluminate and di calcium silicate when combines with water.
4	Hydraulic property	No hydraulic property.	Possess hydraulic property.
5	Colour	White.	Moderate white
6	Strength	Not so hard.	Highly hard.
7	Uses	Useful for white washing.	To prepare mortar used for the masonry work in water logged areas.
