As this tiles are coming from Mangalore of Karnataka state to Tamilnadu, these are called Mangalore tiles. This tiles are also manufactured in Cochin, Calicut of Kerala state. Maximum 24% of water can be absorbed by "A" class Mangalore tile.

ACTIVITY 4

Prepare an album by pasting different types of floor, roof, and drain tiles.

5.3.2.3.6 Pan Tiles

These are small and hard. When compared to pot tiles, they have minimum undulations. Good quality tiles are manufactured by moulding, drying and burning. The length is 33 cm to 38 cm. The breadth is 23cm to 28cm.

5.3.2.3.7 Pot Tiles

These are ordinary semi-circular country tiles. As this tiles are made by Pot makers, they are called pot tiles. These tiles are small and comfortable to handle. So, it is called hand tiles in Tamil Nadu. These tiles are easily breakable.

5.3.3 Ceramic Tile

Ceramic tile is made up of sand, natural clay, and water. Once it has been moulded into shape they are then fired in kiln. Ceramic tiles can either be glazed or unglazed. In buildings, ceramic tiles are used as floor andn wall tiles. Common types of ceramic tiles used in construction are :

1. Ceramic floor tiles
2. Ceramic terracing tiles
3. Ceramic ceiling tiles
4. Glazed ceramic tiles
5. Fully vitrified tiles
6. Porcelain tiles
