constructions over doorways, windows and fire places.

Semi Circular Arch

It is also known as Roman arch. This is the modification of segmental arch in which the centre point lies on the springing line. The shape of these arches are semi-circle. The thrust transferred to the abutments is perfectly in vertical direction since the skewback is horizontal.

Horse Shoe Arch

DO YOU KNOW?

Gate way arch, St. Louis, United States is the tallest arch monument in U.S (height 630 feet)
