

These stairs are circular in shape. In spiral stair the radius of curvature is small and the stairs may be supported by a centre post. Over all diameter of such stairs may range from 2 to 2.5 metre.

8.1.4.5 Bifurcated Stairs

Stairway to heaven:

The 300 feet spiral staircase has been installed on the wall of the Taihang Mountains in Linzhou to offer the thrill of mountaineering without the danger.

ACTIVITY 1

Collect the pictures of the most luxurious unique and spectacular staircase in the word and make an album.

These stairs are so arranged that there is a wide flight at the starting which is sub divided into two narrow flights at the mid landing.

Generally, these stairs are more suitable for modern public buildings.
