ii. Corrugated Sheet

These sheets are prepared by pressing plates between rollers. These sheets are manufactured with series of parallel depression (Corrugations) from one end to the other. These sheets are more resistant to fire. These sheets produce noise when rain water falls on them.

Crank bolts and 'J' hooks are used to fix these sheets with the purlins. To avoid the leakage of water through holes, bituminous washers are used. There are 7.5 corrugations in this sheet. The upper and lower corrugations are equal. The thickness of these sheets is 6mm. They are available with a breadth of 1.05m and lengths of 2.5m, 3.0, 3.5m and 4m.

Uses of AC Sheets

i. AC sheets are fairly cheap and not easily affected by fire.
ii. They need not be painted.
iii. It is not affected by insects.
iv. It is used in industries, factory buildings and workshops.

Characteristics of AC Sheet

i. Asbestos cement sheet can be sawn, nailed or punched.
ii. They are sound proof.
iii. They are not affected by acids and alkalies.
iv. The Maintenance cost is low.
v. They are used for decorative purpose.

AC Ridge Piece Cover

To avoid water entering into the roof, the cover pieces laid at the top junction of the two sloped AC sheets are known as AC ridge covers.

8.2.7.2 Light Roofing Sheets

These roof coverings are manufactured by inserting wool cloth in between the two asbestos clothes with corrugations. The thickness of these sheets is 3mm. They are available in a breadth of 1m and length of 2m, 2.5m and 3m. They are painted with aluminium paint on both sides. They are easily bendable and easy to cut and nail. These sheets are cheap in cost but has less strength. This type of roof covering is suitable for cattle sheds and temporary sheds.

Types of light roofing sheets

i. Tar sheet
ii. Plastic sheet
iii. Poly vinyl chloride sheet

8.2.7.3 Galvanized Iron Sheets

These sheets are prepared by pressing wrought iron plates between rollers. They are galvanized with a zinc coat to avoid rusting due to climatic change. They are strong due to corrugations. They are also manufactured as plain sheets.

Advantages of Galvanised Iron Sheet

i. They need not be painted, so cost reduces.
ii. It is weightless. So, handling is easy.
