2.2 AUTOCAD BASICS

Learning Objectives

At the end of this lesson you shall be able to

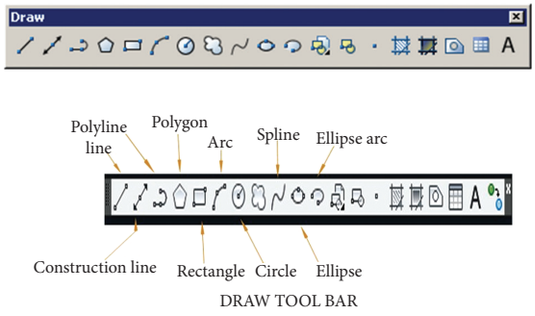

- State the draw commands, modify, text & dimension commands, layer & editing commands and its uses.
- Draw the engineering drawing using commands.

TC2PYV

2.2.1 Introduction

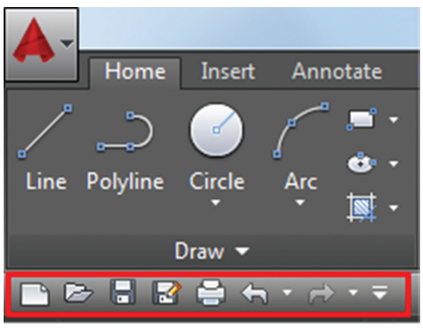

To draw a drawing using AutoCAD software so many commands are required. For this, there was a necessity of compulsory typing in the command box. But, in the latest or modified software of Auto CAD 2000, 2002, 2004, 2007, 2010 the highly used commands are given in toolbar or icon. Let us know the required commands to draw a building drawing.

2.2.2 Draw Commands

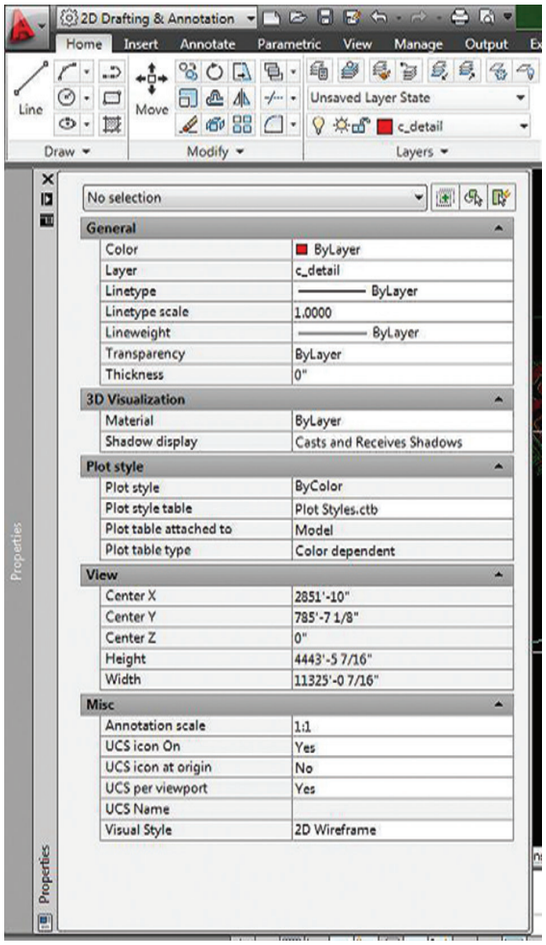

DRAW TOOL BAR

2.2.2.1 Line

Lines are drawn using line command. The line toolbar is used to draw the line (or) type 'line' and enter (or) type 'l' and enter. Instead of giving enter, we can also click the right button in the mouse.
