ACTIVITY 3

Draw some arcs by using any one method and take print outs.

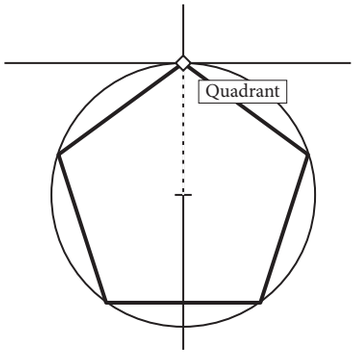

2.2.2.6 Polygon

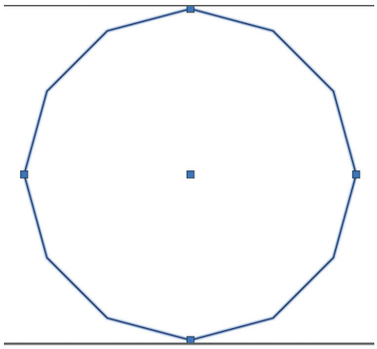

A closed drawing drawn with several angles (or) with several sides is called as polygon. In this, angle (or) sides should be equal in measurement. Polygons of 3 to 1024 sides can be drawn.

3 Sides Polygon (Triangle)

5 Sides Polygon (Pentagon)

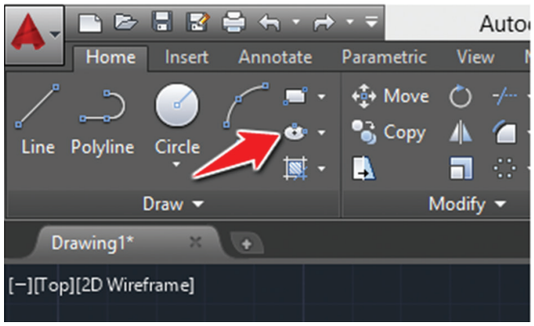

Polygon With 12 Sides (Dodecagon)

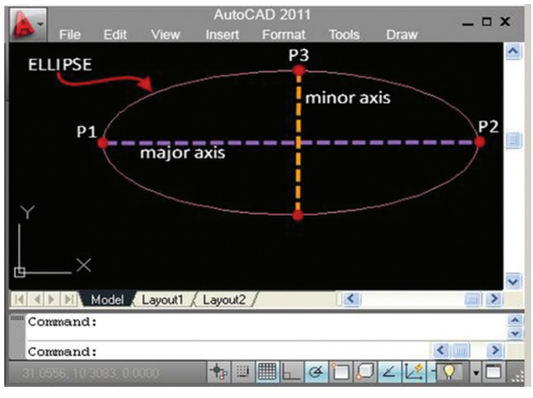

ACTIVITY 4

Draw some polygons of different number of sides and take print outs.

2.2.2.7 Ellipse

Ellipse is a closed curve drawn by two different axes. One axis is noted as major axis and another is noted as minor axis. It is noted that half of the distance of minor axis is axis distance. With this point, we can draw the ellipse in 4 methods.
