style (or) annotative text style from this command.

2.2.4.2 Single Line Text

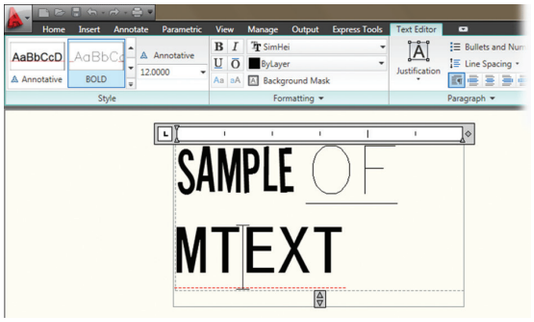

Single line text is used for small content and to write short words.

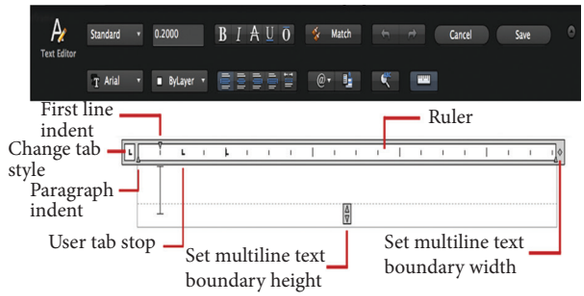

2.2.4.3 M Text

M text command is used to form the typed words into a sentence. This command will decide the text boundary. The typed sentences are included in the boundary. The lines are formed as a single object.

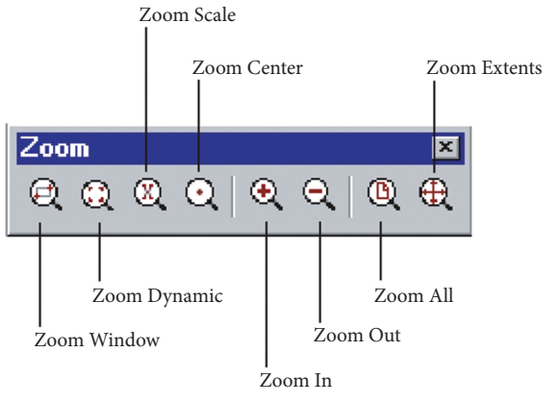

2.2.4.4 Editing Text

If there is any spelling mistake in the typing, it may be corrected by using this command.

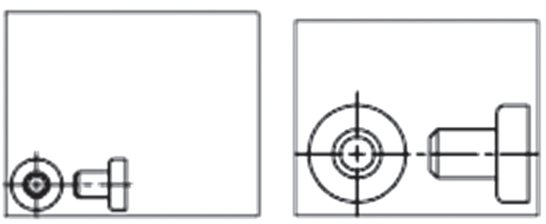

2.2.5 Zoom Command

This command is used to see the object by magnifying (or) reducing it.

i) Zoom Extent

before Zoom Extents

after Zoom Extents

ii) Zoom Window

iii) Zoom Dynamic
