24. Diffusion of gases occurs in the alveolar region only and not in any other part of the respiratory system. Discuss.

25. Sketch a flow chart to show the path way of air flow during respiration.

26. Explain the conditions which creates problems in oxygen transport.

Disorders of Respiratory System

Respiratory system is highly affected by environmental, occupational, personal and social factors. These factors may be responisble for a number of respiratory disorders.

- **Pulmonary embolism** is a blood clot that occurs in the lungs.
- **Bronchitis** is an inflammation of the lining of your bronchial tubes.
- **Asthma** is a condition in which airways narrow and swell and produce extra mucus.
- **Lung cancer** -The number one cause of cancer deaths. Smoking is the risk factor for lung cancer.
- **Pneumonia** is an inflammatory condition of the lung affecting primarily the small air sacs known as alveoli.
- **Pulmonary edema** is a fluid accumulation in the tissue and air spaces of the lungs.
- **Emphysema** A lung condition that causes shortness of breath due to widening of alveoli.
- **Atelectasis** is a collapse of a lung or lobe of a lung develops when alveoli within the lung become deflated.
- **Tuberculosis** is an infectious disease caused due to *Mycobacterium tuberculae* .
- **Pleurisy** is a condition in which the pleura becomes inflamed.
