19. The type of movement exhibits by the macrophages are
    a. flagellar b. ciliary
    c. muscular d. amoeboid
20. The pointed portion of the elbow is
    a. acromion process
    b. glenoid cavity
    c. olecranon process
    d. symphysis
21. Name the different types of movement.
22. Name the filaments present in the sarcomere.
23. Name the contractile proteins present in the skeletal muscle.
24. When describing a skeletal muscle, what does "striated" mean?
25. How does an isotonic contraction take place?
26. How does an isometric contraction take place?
27. Name the bones of the skull.
28. Which is the only jointless bone in human body?
29. List the three main parts of the axial skeleton
30. How is tetany caused?
31. How does rigor mortis happen?
32. What are the different types of rib bones that form the rib cage?
33. What are the bones that make the pelvic girdle?
34. List the disorders of the muscular system.
35. Explain the sliding- filament theory of muscle contraction.
36. What are the benefits of regular exercise?

ICT Corner We like to move

Let's explore the skeletal system page to understand the **skeletal organization.**

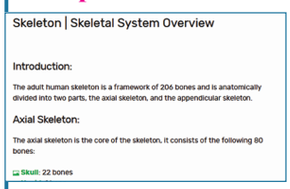

Step – 1 Use the URL to reach the 'Skeletal System' page. From grid select 'Skeleton Organization' and explore the skeleton's general anatomical arrangement and functions.

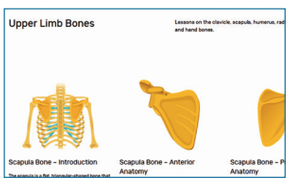

Step – 2 Then reach the 'Skeleton Organization page by clicking back button on the top of the window or use the 'Backspace' key. Select 'Upper Limb Bones' from the grid and explore the anatomy and functions of the clavicle, scapula, humerus, radius, ulna, carpal, and hand bones.

Step – 3 Follow the above steps and explore the interactives of each part and its functions.

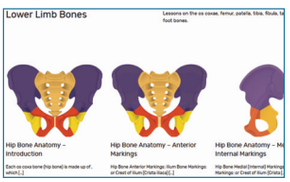

Step – 4 Use the reference given below the page to acquire additional details about 'Skeletal System'.
