V. Given below is the distance-travelled by an elephant across a forest with uniform speed. Complete the data of the table given below with the idea of uniform speed.

Distance (m)	0	4		12		20
Time (s)	0	2	4		8	10

VI. Complete the analogy.

1. Kicking a ball : Contact force :: Falling of leaf : _____?
2. Distance : metre :: Speed : _____ ?
3. Circulatory motion : A spinning top :: Oscillatory motion : _____?

VII. Complete the web chart.

VIII. Answer in a word or two.

1. The force which acts on an object without physical contact. _____
2. A change in the position of an object with time. _____
3. The motion which repeats itself after a fixed interval of time. _____
4. The motion of an object which covers equal distances in equal intervals of time. _____
5. A machine capable of carrying out a complex series of actions automatically. _____

IX. Answer briefly.

1. Define force.
2. Name different types of motion based on the path.
3. If you are sitting in a moving car, will you be at rest or motion with respect your friend sitting next to you?
4. Rotation of the earth is a periodic motion. Justify.
5. Differentiate between rotational and curvilinear motion

X. Answer in detail.

1. What is motion? Classify different types of motion with examples.

XI. Problems.

1. A vehicle covers a distance of 400km in 5 hour. Calculate its speed.

XII. Give examples.

Linear motion	
Curvilinear motion	
Self rotatory motion	Motion of the wheel in a cart
Circular motion	
Oscillatory motion	
Irregular motion
