Virus

Virus is an infective agent that typically consist of nucleic acid molecule in a protein coat. It replicates only inside the cells of other living organisms. Virus can infect all types of life forms like plant, animals and microorganisms. They invade living normal cells and use their cell machinery to multiply. They can kill, damage or change the cells and make you sick.

A Virus that contains R.N.A. instead of D.N.A. is called a Retrovirus

Diseases caused by Virus

1. Common cold
2. Influenza
3. Hepatitis
4. Polio
5. Smallpox
6. Chicken pox
7. Measles

Discuss in your classroom

Is virus a living thing or non living thing?

Suggested project

Get a vaccination schedule from a nearby doctor or a hospital. From the list, identify the bacterial diseases and the viral diseases for which vaccination is given.

Points to Remember

- There are six nutrients. They are: Carbohydrate, Fats, Protein, Vitamins, Minerals and Water
- Kwashiorkor and Marasmus are protein deficiency diseases.
- Night blindness, scurvy, rickets and beriberi are vitamin deficiency diseases.
- Bacteria is a prokaryotic microorganism.
- Cholera, typhoid and pneumonia are bacterial diseases.
- Influenza, common cold and chicken pox are viral diseases.

Evaluation

I. Choose the correct answer.

1. Our body needs _____ for muscle building.
   a) carbohydrate b) fat
   c) protein d) water
2. Scurvy is caused due to the deficiency of_____.
   a) Vitamin A b) Vitamin B
   c) Vitamin C d) Vitamin D
3. Calcium is an example for
   a) carbohydrate b) fat
   c) protein d) minerals
4. Bacteria are very small _____ microorganism.
   a) prokaryotic b) eukaryotic
   c) protozoa d) acellular
