Jack : Simple machines are mechanical devices for applying force like a wedge or ramp.

Jimmy : Oh! wow! How I did not know this!

Jack : Like the wheels on hospital bed and IV pole. They help you move people faster by reducing the friction.

Jimmy : Is the stick over there that the TV is attached to, is that a simple machine too?

Jack : Yes it is, it's a lever. The wheels on the bus are simple machines, they make the bus move.

Jimmy : What about the doors?

Jack : Yeah, the driver pulls a lever and the doors open and you climb up the inclined plane aka the stairs. The cable in the elevator is wrapped around a groove in the wheel and axle, an electric motor pulls the cable, lifting the car between floors.

Jimmy : So the wheels on the rolling chair are too by rolling the chair back instead of lifting the chair back.

Jack : Yes, they are, they move the chair and reduce the friction.

F. Ask the students to tell a story. It may be a true story or an imaginative story. Choose one of the titles from the following.

- ❖ A time I was very late.
- ❖ A funny story about my friend.
- ❖ I met someone very interesting.
- ❖ An unusual event.
- ❖ A funny story about my life.

Think about your story

- ❖ When did it happen?
- ❖ Where were you?
- ❖ Who was there?
- ❖ What happened?
