1.2b Able to learn the names of angle like acute, obtuse and right angle:

We shall classify the angles into various types based on its measurements. Let us create the various angles by combining the two wooden frames. Observe the various angles formed in the wooden frame

Sl. No.	Picture	Type of angles	Measure of the Angle
1		Acute angle	Greater than 0° less than 90°
2		Obtuse angle	Greater than 90° less than 180°
3		Right angle	Exactly 90°
4		Straight angle	Exactly 180°

Name the types of angles formed in the following items.
