

The things that Archaeologists find during excavation are called **artefacts.** Archaeologists can tell a lot about people who lived there by looking at the remains of their houses, clothes, bones and other artefacts.

ACTIVITY

Let us do

The class will get divided into 3 groups and plant a sapling in the school premises. The students will clear the soil, dig the soil and plant the sapling.

If I dig the ground near my house, will I get artefacts?
