Rivers:

Rivers are large streams that flow over the land. They are fresh water bodies which generally orginate at mountainous areas. They usually drain in oceans or seas.

Example: Ganga and cauvery.

Lakes:

A **Lake** is a water body surrounded by land on all sides. They are either fresh or salt waterbodies.

Example: Kolleru lake (fresh water) Sambar lake (salt water).

Gulf:

Gulf is a deep inlet of the sea surrounded by land with a narrow mouth.

Example: Gulf of kuchch.

Bay:

Bay is a broad inlet of the water body where the land curves inwards.

Example: Bay of Bengal.

Lagoon:

A stretch of salt water separated from the sea by a low sand bank.

Example: Lake Chilika in Odisha.

Strait:

A **strait** is a narrow stretch of water which joins two larger water bodies.

Example: Palk Strait connects Bay of Bengal and Indian Ocean.

Waterfall:

Waterfall forms when a river stream flows from a great height.

Example: Courtallam Waterfall
