Multiplication in capacity

Example

Multiply the following:

4 l 200 ml x 3

	l	ml
	4	200
×		3
	12	**600**

4 l 200 ml x 3 = 12 l 600 ml

Try this
2 l 250 ml × 2

Example

Deepak fills 1 litre 500 ml petrol in a day. How much amount of petrol will he fill in 5 days?

Solution:

		l	ml
		❷	
Petrol filled by Deepak in a day	=	1	500
Petrol filled by Deepak in 5 days	=	×	5
Total quantity of petrol	=	**7**	**500**

Division in capacity

Examples

(i) 2 l 320 ml ÷ 2

	l	ml
	1	160
2	2	320
	- 2	
		3
	-	2
		12
		12
		0

2 l 320 ml ÷ 2 = 1 l 160 ml

Try this
18 l 240 ml ÷ 6
