Example 5.6

Rani buys a saree which costs ₹675.50. She wants to buy 12 such sarees. What will be the cost of 12 sarees?

Solution

Cost of one saree = ₹675.50

Cost of 12 sarees = ₹675.50 × 12

= ₹8106

(i) Multiply the paise

50 × 12 = 600 paise

Convert the paise into rupees 600 paise } = ₹6

(ii) Multiply the rupees

625 × 12 = 8100

Now, add (i) and (ii) to get

= 8100+6

= 8106

Example 5.7

Find the answer for ₹65,295 ÷ 9

Solution

$$
\begin{array}{r}
7255 \\
9\overline{)65295} \\
63 \\
\hline
22 \\
18 \\
\hline
49 \\
45 \\
\hline
45 \\
45 \\
\hline
0
\end{array}
$$

Therefore, ₹65295 ÷ 9 = ₹7,255

Example 5.8

The total cost of 7 pens is 105. Find the cost of one pe

Solution

Total cost of 7 pens is = ₹105

Therefore, cost of one Pen = ₹105 ÷ 7

= ₹15

Therefore, the cost of one pen is ₹15.

$$
\begin{array}{r}
15 \\
7\overline{)105} \\
7 \\
\hline
35 \\
35 \\
\hline
0
\end{array}
$$
