Activity

Consider the situation

Vizhyan's birthday is on Wednesday. His father asked his sister Poovizhi to arrange for the party. She is happy to do it but does not know how to arrange for the party. Her father suggested her to first break the event into smaller tasks and complete those tasks one by one. Poovizhi thought that this way she could easily arrange for the party. If you are Poovizhi what would be tasks you will plan for. Write the smaller tasks which you will arrange.

Solving a multiplication problem involving 2 three digit numbers.

Let us split the task of multiplying 2 three digit numbers into the following steps.

Multiplying 2 three digit numbers can be done easily if we do it step by step.

Step 1 – Multiplying the ones digit with the first number

$$\begin{array}{r} 567 \times 253 \\ \hline 1701 \end{array}$$

Step 2 – Multiplying the tens digit with the number

$$\begin{array}{r} 567 \times 253 \\ \hline 2835 \end{array}$$

Step 3 – Multiplying the hundreds digit with the first number

$$\begin{array}{r} 567 \times 253 \\ 1134 \end{array}$$

Step 4 – Add all the results of step 1, step 2 and step 3 to find the multiplication of

$$\begin{array}{r} 567 \times 253 \\ \hline 1701 \\ 2835 \\ 1134 \\ \hline 143451 \end{array}$$
