Mehsana	Gujarat
Nagpuri	Central and South India
Nili Ravi	Punjab, Haryana

❖ Feeding

Cattle need nutritious feed in order to be healthy and to produce high milk yield. The cattle feed includes roughage and concentrates. The roughage contains high amount of fiber and it includes fodder, hay, straw and silage. Concentrates include broken grams, cereals, millets, rice polish, cotton seeds and oil cakes. Apart from these feed, cattle need an adequate amount of fresh water.

❖ Diseases

Foot and mouth disease and anthrax are some of the common diseases found among cattle. Maintaining proper sanitation is necessary to stop the spread of these diseases. Timely vaccination can prevent most of the diseases. Veterinary medicine deals with the prevention, diagnosis and treatment of disease, disorder and injury for domestic and non-domestic animals.

Activity 3

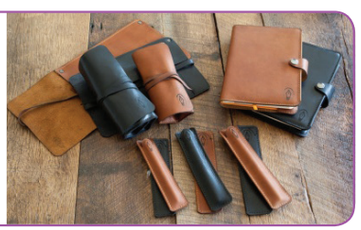

Visit a veterinary hospital in your area and find out the common diseases found among the cattle in your area. Try to know how such diseases can be prevented.

❖ Uses

Cattle are useful to us in a number of ways. Some of them are listed below.

- We get milk from cows. Cow's milk contains essential minerals needed for us.
- Bullocks are used to plough land, harvest and thrash crops.
- Cattle are employed in transportation.
- Cattle dung is used as manure. It is also used as fuel and for generation of biogas.
- Panchagavya is an ayurvedic medicine used in agriculture to control pest and fungi. It is a mixer of dung and urine of cows, fresh milk, curd, jaggary and ghee.
- Leather goods are manufactured from cattle hides.
