# Chapter 5 Bakery

## 5.1 Preparation of Yeast Solution

**Aim:** To obtain the skill of preparing yeast solution.

**Equipment needed**: A bowl, thermometer, spoon and a stove.

### Preparation of Yeast Solution

Yeast is the essential ingredient in bread baking. Since yeast is a living organism, having fresh yeast and using it properly will help in successful baking.

### Important tips

- Always use dry yeast at room temperature.
- Using a thermometer is the most accurate way to determine the correct liquid temperature. Any thermometer will work as long as it measures temperatures between 75°F and 130°F.
- Yeast can be **dissolved in water** before mixing with the rest of the dry ingredients.
- Rehydrating dry yeast before using gives it a "good start" – the yeast feeds on the sugar allowing it to become very active and ready to work in dough.
- Water is recommended for dissolving yeast.
- Dissolve 1 tsp. sugar in 1/2 cup water (110°F–115°F).
- Stir in the yeast until completely dissolved.
- Let the mixture stand until yeast begins to foam vigorously (5 – 10 minutes).
- Now yeast solution is ready for preparing dish.

### Recipes using yeast solution

### Doughnut

| Ingredients | | Quantity |
|---|---|---|
| For yeast solution: | | |
| Yeast | : | 1tsp |
| Water | : | 30 ml |
| Sugar | : | 10 g |
| For the dough: | | |
| Maida | : | 200 g |
| Baking powder | : | 3 g |
| Milk powder | : | 10 g |
| Egg | : | 1 |
| Water | : | 70 ml |
| Sugar | : | 20 g |
| Fat | : | 30 g |
| Salt | : | 3 g |
| Vanilla essence | : | 5 drops |
| Lemon essence | : | 2 drops |
