Chapter 2 Basics of Food

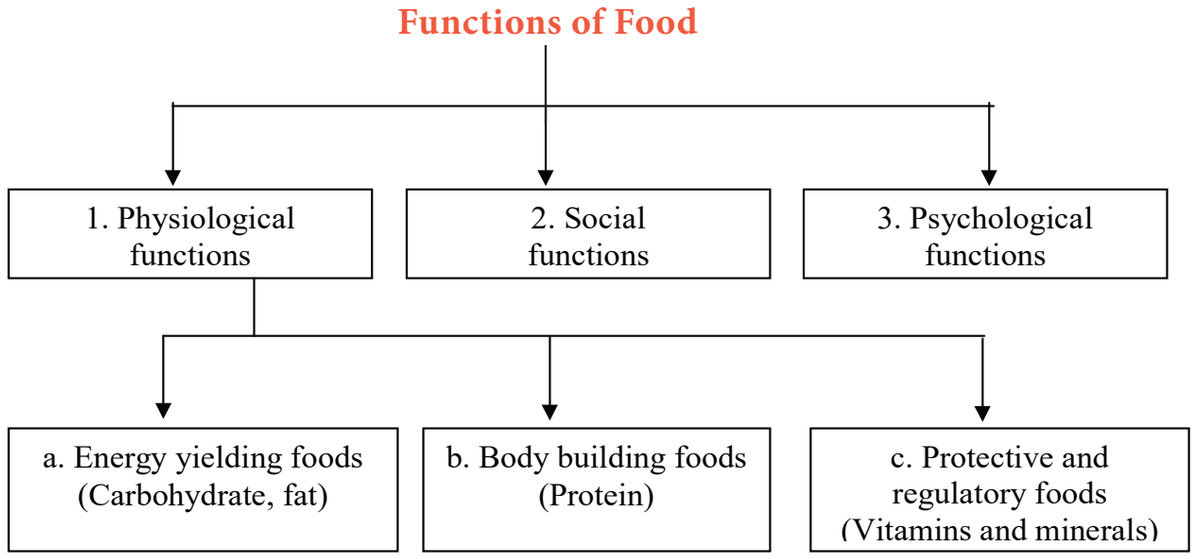

Learning Objectives

- Know about the food groups and its significance.
- Gain knowledge on food pyramid.
- Apply the knowledge on maintaining good health.
- Understand the basic principles of the preparations.

Food is an important basic need of man and is needed for growth, development and to stay healthy. Food contains nutrients that are essential for body functions and for maintaining normal nutritional status. Hence, food plays a key role in a person's physical and mental wellbeing. The nutrients like carbohydrates, proteins, vitamins and minerals not only help a person with good health but also meet the additional needs during special conditions like pregnancy, lactation and during convalescence.

2.1 Functions of Food

Food can be classified according to the function it performs.
