the same quality with every meal. The success of a food service is determined by quality assurance by providing wholesome quality food to the customer in a pleasant manner. High-quality ingredients and experienced personnel are important to serving good food consistently. The way of presentation can lift the dish out of the realm of the ordinary and make it a special creation. These can be achieved by colour and appearance, texture and variety, food presentation and service and ambience.

a. Colour and Appearance: The appearance of the food helps to attract the attention of the customers as the looks help in tasting the food. The appearance can be colour, texture and also presentation. Food can be made appealing and appetizing by the way foods appear on the plate. The colour combination with vegetables, natural food colour and combination of spices makes the dish beautiful and more attractive to the customer. Appearance of food only decides the customer's choice of food to be consumed. It describes the origin of food and creativity of the presenter looks and appetizing. Rice served in white color with curd raitha may look monotonous instead of pulao served with tomato sauce or plain rice with sambar may be eye appealing. Little coriander on soups or any dish or a salad with different vegetables or a fruit salad with all kinds of fruits helps to increase the stimulation.

b. Texture and Variety: Texture is the sense of food. Choose textures that complement each others. Contrasting texture adds much to the value of food and can lift the dish. If texture in all soft or all firm, it does not appeal to the customer. It is interesting to have variety of textures on the plate but how these textures are combined is very important.

Another important rule is balancing variety and contrast. Variety can be achieved by various textures and colour. Vegetables combined with different cuts to make vegetable noodles – (Julienne 1/4 inch strips) or vegetable rice (Dice $1/2 \times 1/2$ inch).

c. Food Presentation and Service: Food presentation is as important as taste and flavour of food. The way food is presented to the customers will make a restaurant successful and unsuccessful. No matter how delicious a dish may be, it really matters how it is presented. Service depends on customer expectation. Convenient, timely service, good presentation, serving food at correct temperature and cordial personnel will attract customers. **Eg:** For a kids party it can be fun design instead traditional presentation. Vegetable and fruit carvings, designs and toppings will help to increase the attractiveness of the food, depending on the type of food.

Successful handling of food by maintaining its right temperature with right accompaniments (combination) helps to present the food to full advantage. Preparation of service in terms of laying the cover, placing the right crockery, cutlery according to the dishes that will be served leads to success of any food service. In Indian cuisine banana leaf, katories and Thali are used to serve in a traditional way. While for international cuisines appropriate crockery and cutlery for each course should be placed.
