# Chapter 3 Selection of Foods and Methods of Cooking

R5CDE3

## Learning Objectives

- Identify the resources needed for food selection, purchase and storage.
- Know the techniques of food purchase and food standards.
- Know the appropriate methods of food storage.
- Learn different methods of cooking.
- Understand the impact of fast food on health.

The food industry varies from the simplest to the multifaceted that may involve public dining rooms, employee dining rooms, cafeterias, banquet service and room service. Such institutions serve various functions depending on the demands by the customers and vary from small to very large establishments.

Individuals working in food service management need a variety of skills that can be acquired through training in proper selection, purchasing, storage of foods, hospitality, marketing, sales and accounting.

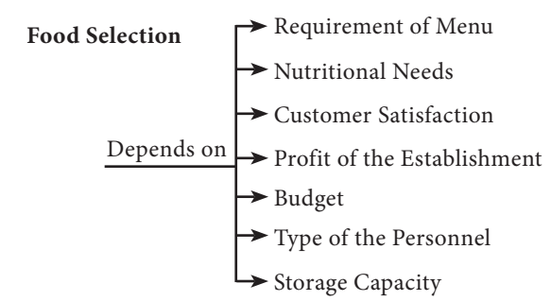

## 3.1 Selection, Purchase and Storage of Foods

### 3.1.1 Food Selection

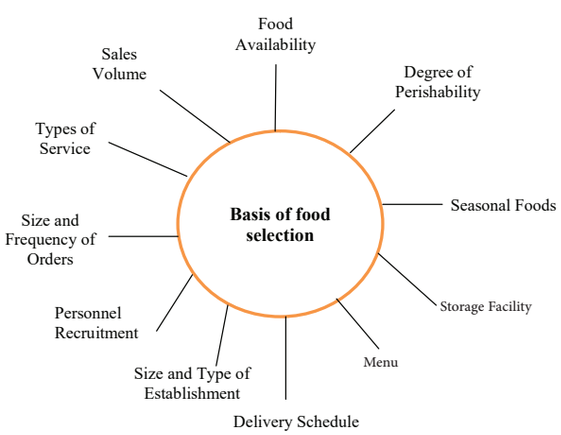

**"Food selection is a choice of selecting a food which is good for the customer".**

Selection of food is very important in running a food service. Providing food in a manner which is satisfactory to customer is a challenging task.

Careful thought, planning and appropriate decision is very important in selection of food. Quality food can be selected when standards like FSSAI are followed.
