Learning how to measure ingredients is essential for any preparation. Being well versed with all measurements eases any preparation.

All foods have to be prepared before cooking and serving **Eg:** washing, peeling, cutting, grinding. Each process requires good skills.

1. Tools for Measuring:

The three basic tools of measurement includes:

Measuring spoons – Includes tea spoon, table spoon

▲ Plate 4.24 Measuring Tools

▲ Plate 4.25 Measuring Spoons

Dry measuring cups – They are usually made of glass, stainless steel, aluminum or plastic and have even rim.

▲ Plate 4.26 Dry Measuring Cups

▲ Plate 4.27 Liquid Measuring Cups

Liquid measuring cups – These cups have pour spouts and handles which help in adding the liquid ingredients like milk, water and oil.

Measuring Tips

- Do not measure over mixing bowl
- A pinch is smaller than a dash (1/16 tsp)
- Measuring by weights rather than by volume is much more accurate.

2. **Tools for Stirring, Dipping and Turning:** It includes spoons, ladles, turners, spatulas and tongs.
3. **Tools for Blending:** Mixer is an important labour saving electrically operated piece of equipment for multipurpose use. For example, mixing pastry, cakes, mashing potatoes, beating egg, mincing or chopping meat and vegetable, beating butter, whipping cream and dough–wet dry. Blenders
