The following is a basic recipe using the rubbing in method which makes around 12 small biscuits.

Ingredients		Quantity
Plain flour(maida)	:	100g
Butter, cubed	:	50g
Caster sugar	:	50g
Egg yolk	:	1
Vanilla essence	:	1g
Salt	:	a pinch

▲ Plate 5.2 Rubbed in Biscuits

Method

- Heat oven to 190°C.
- Place the flour in a large mixing bowl, add the butter cubes and rub in with fingertips until the mixture resembles breadcrumbs.
- Stir in the sugar then add the egg yolk and vanilla extract and mix to a firm dough. Add a little milk if the dough is too thick.
- Although the dough is firm, it often benefits from a short time chilling in the refrigerator or in the freezer.
- It can be rolled out to around 1cm or ½ inch thickness before being cut into shapes or can be moulded into a log, chilled or frozen well, then cut into slices
- Bake for 10–15 minutes until slightly risen and just golden. Cool on a wire rack.

2. Creamed Biscuits:

Fat and sugar should be creamed. This is done by placing softened butter in a large mixing bowl, then adding the sugar, and beating the ingredients together with a wooden spoon or electric whisk, until the mixture is well blended, light and fluffy.

Depending on the type of biscuit being made, wet ingredients such as eggs or milk are stirred in before the flour or other dry ingredients are added. These doughs are often very soft, so small spoonfuls are dropped onto baking sheets.

3. Whisked Biscuits:

The name refers to the way in which the egg content is treated. Egg whites are
