

▲ Plate 5.10 Bakery Unit

3. Availability of electricity and other fuels.
4. Availability of potable water.
5. Transport and marketing.

1. Location

Bakery unit can be located near industries, educational institutions and public transport services.

2. Government Procedures

The detailed information on the government procedure can be obtained from the office of the State Directors of Industries and Small Industries Service Institutes.

3. Arrangement for Finance

The financial planning of project is a very important factor in a country like India, where the prices of most of the raw materials are fluctuating heavily. The main problem which is faced practically by every entrepreneur is obtaining loans from banks and financial institutions on time. Proper precautionary measures must be taken for effective planning of the finances.

4. Design of the Plan

The machinery layout can influence erection cost, operating and maintenance cost, safety and convenience.

The following points may be used as guidelines for layout planning.

a. A flow chart indicating the flow of materials should be first prepared and then it should be arranged in a proper way.
b. Sufficient distance must be kept between each process or storage equipment of the major type to provide enough space for the movement of men, material and machinery.
c. The baking oven should preferably be located in one corner of the plant which is open from all sides rather than in the middle or centre of the plant.

5. Selection of Equipment

Type of equipment selected will depend on the type of products, the volume, the size and the profitability of the products to be manufactured.

6. Total Space Required for the Bakery

A minimum area of 1200 sq.ft.is required for the production of 3000 loaves of 400g each per day (i.e flour utilised will be approximately 900 kg) which can accommodate future expansion up to 5000 to 6000 loaves of 400g each per day.
