6	**Applications of Differentiation**	**128-160**	
6.1	Applications of Differentiation in Business and Economics	128	October
6.2	Maxima and Minima	139	
6.3	Applications of Maxima and Minima	144	
6.4	Partial Derivatives	149	
6.5	Applications of Partial Derivatives	152	
7	**Financial Mathematics**	**161-177**	
7.1	Annuities	161	October
7.2	Stocks, Shares, Debentures and Brokerage	167	
8	**Descriptive Statistics and Probability**	**178-209**	
8.1	Measures of Central Tendency	178	November
8.2	Measures of Dispersion	188	
8.3	Probability	196	
9	**Correlation and Regression Analysis**	**210-235**	
9.1	Correlation	210	November
9.2	Rank Correlation	215	
9.3	Regression Analysis	218	
10	**Operations Research**	**236-255**	
10.1	Linear Programming Problem	236	December
10.2	Network Analysis	244	
	Answers	**256-274**	
	Tables	**275-280**	
	Books for Reference	**281**	

As the Statistics component of this text book involves problems based on numerical calculations, Business Mathematics and Statistics students are advised to use calculator
