Many people are fascinated to collect coins from different countries. Sometime relatives who visit or work in other countries bring and give the coins of the foreign country to us! This hobby is known as numismatics. Some others take interest to collect seashells. It is said that there are more than 1,00,000 shell species found in the sea shores. The rarest, the most valuable, and the most beautiful shells are found in the Indo-Pacific, Caribbean, and Mediterranean regions.

Cooking is one of the oldest hobbies. It is now even considered a life-skill to know how to cook. We all should try and learn to cook! Painting can help unleash your creative side. Painting allows you to tap into the thoughts, desires, and feelings in your head and translate them into something beautiful.

Painting relaxes our mind and helps focus better, so go ahead and pick up a paintbrush. Teaching is a fun and useful hobby. Teaching helps us understand what we have learned better. It also helps us to help other children. If we are good at teaching then, one day we can even become a good teacher! Web-browsing helps us collect information about the latest medical invention, the new technology for phones and news about our society and country. It is an amazing hobby where we can learn about things that are thousands of kilometres away with just a few clicks! We can also share all the wonderful information with our friends.

Unit – 3

Fleming's thought at breakfast

K7W7A2

Sir Alexander Fleming, who discovered penicillin, was once forced into an interview in New York by two journalist just as he was about to have breakfast. One of them asked him, 'Sir, what are you thinking about right now? We wish to know what a great scientist think while getting ready for breakfast'.

Fleming mused awhile on the question and he replied, 'I am thinking of something very special'. The journalist, who were all ears, drew themselves forward. 'I am thinking, whether to have one egg or two'.
