Example 1.15 Naren bought 7.4 *kg* of mangoes. On the way home, he gave 4.650 *kg* of mangoes to his sister's family. Find the weight of the remaining mangoes.

Solution

Mangoes bought by Naren	= 7.4 *kg*
Mangoes given to Naren's sister	= 4.650 *kg*
Mangoes left for Naren's family	= 7.400 – 4.650
Weight of remaining mangoes	= 2.750 *kg*

Fig. 1.6

Therefore, the weight of the remaining mangoes is 2.750 *kg*.

DO YOU KNOW?

We use decimals every day, while dealing with money, weight, length etc. Decimal numbers are used in situations where more accuracy is required.

Exercise 1.2

1. Add by using grid 0.51 + 0.25
2. Add the following by using place value grid.
   (i) 25.8 + 18.53 (ii) 17.4 + 23.435
3. Find the value of 0.46 – 0.13 by grid model.
4. Subtract the following by using place value grid.
   (i) 6.567 from 9.231 (ii) 3.235 from 7
5. Simplify: 23.5 – 27.89 + 35.4 – 17.
6. Sulaiman bought 3.350 *kg* of Potato, 2.250 *kg* of Tomato and some Onions. If the weight of the total items are 10.250 *kg*, then find the weight of Onions?
7. What should be subtracted from 7.1 to get 0.713?
8. How much is 35.6 *km* less than 53.7 *km*?
9. Akilan purchased a geometry box for ₹ 25.75, a pencil for ₹ 3.75 and a pen for ₹ 17.90. He gave ₹ 50 to the shopkeeper. What amount did he get back?
10. Find the perimeter of an equilateral triangle with a side measuring 3.8 *cm*.

Objective type questions

11. 1.0 + 0.83=?
    (i) 0.17 (ii) 0.71 (iii) 1.83 (iv) 1.38
12. 7.0 – 2.83 = ?
    (i) 3.47 (ii) 4.17 (iii) 7.34 (iv) 4.73
