Per cent is derived from the Latin word 'Per centum' meaning 'per hundred'. Per cent is denoted by the symbol '%' and means hundredth too. That is 1% means 1 out of hundred or one hundredth which can be written as $1\% = \frac{1}{100} = 0.01$. It is read as 1 per cent.

In the same way, 50% means 50 out of hundred or fifty hundredth. That is $50\% = \frac{50}{100}$

80% means 80 out of hundred or eighty hundredth. That is $80\% = \frac{80}{100}$

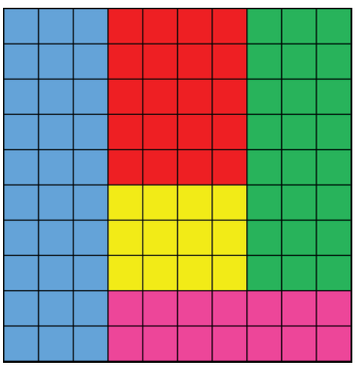

20% means 20 out of hundred or twenty hundredth. That is $20\% = \frac{20}{100}$

To understand this let us do the following activity.

Activity

Take a 10 × 10 square grid to recall the previous knowledge on fraction. The grid is shaded using 5 different colours. The particulars related to blue colour shaded portion shown in the grid is given in the table below. Observe the grid and complete the table.

Colour	Number of Squares	Fraction	Percentage
Blue	30	$\frac{30}{100}$	30%
Red			
Yellow			
Green			
Pink			

From this we can understand that *percentage can be written as a fraction with denominator hundred.*

Try these

Find the percentage of children whose scores fall in different categories given in table below.

Category	Number of students	Fraction	Percentage
Below 60	25		
60 – 80	23		
81 – 90	42		
91 – 99	9		
Centum	1		
Total	100
