4.5.3 Purposes

1. To provide clean and comfortable bed to the patient.
2. To observe and prevent patient's complications.
3. To save time, effort and material.
4. To provide a neat appearance of the ward/ unit.
5. To adapt to the needs of the patient.
6. To avoid patient exertion by making bed.

4.5.4 Principle for Bed making

- Prevents cross infection and multiplication of microorganism.

4.5.5 Types of beds

Types	Indications	Images
1. ***Open (simple) bed:*** This bed is prepared for an ambulatory patient. (walking.)	To provide a clean, smooth and comfortable bed for the patient.	
2. ***Closed (unoccupied) bed:*** This is an empty bed in which the top covers are arranged in such a way that all linen beneath the counter pane or bed spread is full. The bed is protected from dust and dirt until the admission of new patient. On arrival of the patient, this bed is converted to open bed.	Keep the bed ready for receiving the new patient.	
3. ***Occupied bed:*** This bed is prepared for bed ridden patient, lying in the bed.	Provides a clean and comfortable bed with the least disturbance of the patient in it.
