4.6 THERAPEUTIC ENVIRONMENT

4.6.1 Introduction

Ramesh, a 30 year old man got admitted in the hospital with the complaints of injury to his right leg. He had to stay in the hospital for a month. He felt very insecure, lonely and dependent.

4.6.2 Definition

Therapeutic environment consists of more than just a hospital bed and random medical equipments. It refers to the physical, social, and psychological safe spaces that are specifically designed to be healing. It is specifically designed to increase safety, reduce anxiety, and promote independence.

4.6.3 Purposes

1. Maintaining and creating trustful supporting relationship in care of patients.
2. It is clearly and genuinely communicating and performing care activity.
3. Allowing the supportive group to care for the patients.
4. Acceptance of patient's feelings, and values and worthy as a whole.
5. Assist the patient and family in identifying supportive groups.
6. Maintaining a safe and secure environment.
7. Reinforce progress in behaviour or self care activities or terminating the relationship.
8. Encourage evaluation of progress between nurse and the patient.

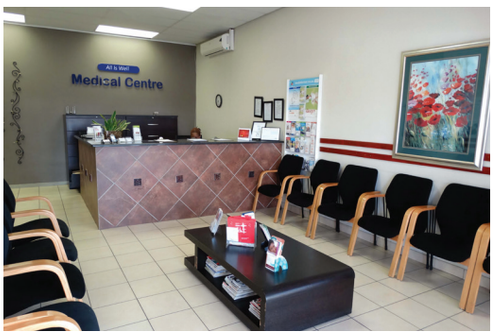

4.6.4 Therapeutic Environment

1. Physically safe space.

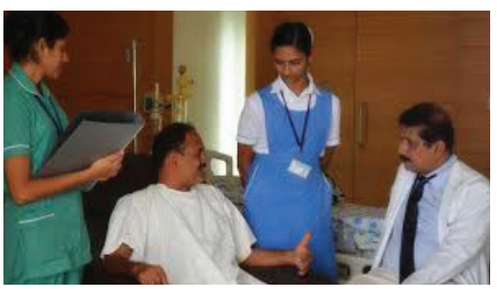

Ramesh is given a clean, comfortable, safe and secured room.

2. Socially safe space.

Ramesh was able to talk and interact with others in the ward.

3. Psychologically safe space.

Ramesh is taken good care of by the doctors and nurses in the ward, therefore, he was less anxious and more independent.

Ramesh's stay in the hospital was an episode he will never forget as his one month stay was well taken care of by the nurses in the ward by creating a stress free therapeutic environment.
