8. Over bed table:(Cardiac table): The table such as the cardiac table is placed in front of the patient and the top of the table is adjusted to the desired height. Pillows can be arranged on the top of the table so that the patient can lean forward on it for support.		When he wants to take food, read or write.
9. Footboards/Foot rests: These are made of wood and are L shaped, so that one end can be slipped under the mattress to hold the other end in a firm upright position. The patient is placed in supine position to rest the bottoms of the feet flat against the surface of the footboard (covered with sheet).		These are used to prevent foot drop by maintaining good alignment.
10. Sandbags: These are canvas, rubber or plastic bags filled with sand and are 1,5 and 10 lbs in weight.		These are used to immobilizethe body part, placing them snugly next to the part. eg. The sand bags can be placed on either side of the feet to maintain the position of the feet on the foot board, to immobilize the fractured limb.
11. Blocks (shock blocks): These are made of wood, may be high or low.		These are placed under the foot of the bed for various reasons. Eg. Surgical shock, traction and postural drainage. This may be placed under the head of bed to promote drainage and improve cerebral circulation.
