Unit 7

FIRST AID

S1T5DV

LEARNING OBJECTIVES

At the end of this chapter students will be able to:

1. Define First Aid
2. List out the principles of First Aid
3. Discuss the first aid measure in shock
4. Explain the immediate management of drowning
5. Describe the plan of action for wound and fracture hemorrhage
6. Apply the skill various extreme heat abnormalities
7. Discuss the immediate management of poisoning
8. Demonstrate the skill in CPR techniqe.

Safety brings first aid to the uninjured
– F.S Hughes

7.1 INTRODUCTION

Not a day goes by that there is not some potential for injury, illness, or sudden health emergency to occur in the places where we live, work, learn, and play. While many of these situations require no more than a Band-Aid, others are more serious and may even be life-threatening. Knowing what to do when an accident happens or when someone becomes suddenly ill can help ensure that minor injuries don't develop into major medical conditions. More importantly, it can save a life.

First aid was being practical from ancient times. It was the famous surgeon who was the first to conceive the idea of first aid. He was **General Esmarch (1823 – 1908)**.

In 1877 **St John Ambulance Association** of England was formed. In 1920, **The Red Cross society** of India was established with more than 400 branches all over India.
