

at risk, and alert the emergency services immediately.

If arriving at a fire or burns incident. STOP, OBSERVE and DO NOT RUSH IN. There may be flammable or explosive substances such as toxic fumes or a risk of electrocution.

During fire DO NOT use lifts in any circumstances.

### Leaving A burning building

- Activate fire alarm you see
- Close each door behind you as you go
- Do not run, but walk quickly and calmly.

### Fire on Cloth

a. STOP the casualty panicking or running around or outside, any movement or breeze will fan the flames.
b. DROP the casualty to the ground.
c. If possible WRAP the casualty tightly in a coat, curtain, blanket, rug or heavy fabric
d. ROLL the casualty along the ground until the flames have been smothered.
e. If the water or another non- flammable liquid readily available, lay the casualty down with burning side upper most, and extinguish the flames by dousing him in plenty of the liquid.

## 7.5 BURNS AND SCALDS

Burns result from dry heat, extreme cold, corrosive substances, friction or radiation including sun rays.

Scalds are caused by wet heat from hot liquids and vapours.
