STUDENT'S ACTIVITY

While swimming in a country pond, one Scout jumps from a rock ledge and does not come back up to the surface. The other Scouts notice he is gone, jump in, and pull him out. He is not breathing and has a gash on his forehead that is bleeding profusely. What you will do with this condition?

Recovery Position

7.9 WOUNDS

Any abnormal break in the skin or the body surface is known as a wound. Open wounds allow blood and other fluids to be lost from the body and germs to enter.

Types of wound	
Incised wound	A clean cut from a sharp edge
