

DO NOT attempt to remove the object you may cause serious injury and push the foreign body even further.

5. Never pour the water and irrigate the ear since this may cause damage to the ear drum, for blockage due hardened blocks take to him to the doctor.

EYE

A speck of dust, loose eye lash or even a contact lens can literally float on the white of the eye and is usually easily removed, however anything that sticks to the eye, penetrates the eye ball, or rest on the colored part of the eye.

Foreign body in Eye

Treatment

1. Advice the casualty not to rub the eye.
2. Sit her down facing the light
3. Gently separate the eyelids with your finger and thumb
4. Examine every part of the eye

NOSE

1. Young Children often insert foreign bodies such as button pencil and beads into nose.
2. Unless it is obviously easy to remove the foreign body the nurse should not try to remove.
3. The child should be warned not to inhale through her nose because this provokes the danger of drawing the foreign body further upward.
4. Advice mouth breathing until removing the foreign body. Refer the child to the doctor.

Foreign body in Nose

THROAT

Small objects like safety pin, irregular objects, fish bone or prawn lodged or obstruct the throat. The nurse should refer the victim to the doctor.
